AQUINIQUES PRIVATE LIMITED

Company Profile

AQUINIQUES

Industrial Engineering & Filtration Solution

AQUINIQUES (Pvt) Ltd is a filtration and water purification company. We supply purification, clarification, separation and filtration solutions to the following industries: food, beverage, oil, gas, chemical, petrochemical, mining, pharmaceutical, cosmetic, automotive, paint, ink, paper, power, as well as food service.

Our filtration product range includes coarse-, micro-, Nano-, hyper- and ultra-filtration with capabilities that range from elevated temperature gas and catalyst separation using sintered metal filters, to molecular filtration using polymeric membrane technologies with removal ratings down to 0.002 micron.

Our Speciality

Below are the applications which we serve in Local Industries:

- RO Pre-Filtration
- RO Membranes
- Final / Post filters (Cartridge Filter, Bag Filter, SS Filter, Metal Filter)
- Process Filters
- Post Mix
- Filter Housings/Assemblies.
- Ultra-filtration (UF)
- Nano Filtration
- High Performance Liquid-Liquid Coalescers / Liquid-Gas Coalescers Filter
- Reverse Osmosis / Desalination Plant
- Waste Water Treatment Plants

Chemicals

- Boilers

AQUINIQUES (Pvt) Ltd provides solutions for filtration, purification and process requirements. Our applications range from simple filtration products to complete integrated filtration and purification systems.

We improve our customers' existing purification and filtration processes by applying our knowledge excellence and by using the best products available to achieve the cost effective and precise outcomes.

- Chillers
- Cooling Tower
- R.O,
- Cooling Cleaners & Waste Water

Products

We supply directly imported product from well-known brands with complete certification and technical literature in local market.

Water and Process Solutions

Dow Water and Process Solutions offer a complete portfolio offline, Ultrafiltration (UF) and Reverse Osmosis (RO) membranes, resin technologies and Electrode (EDI) products.

GE Water & Process Technologies

GE Power and Water, Water and Process Technologies offers the most comprehensive set of equipment solutions and services available, helping its customers manage and optimize their water resources and process challenges across industries and municipalities.

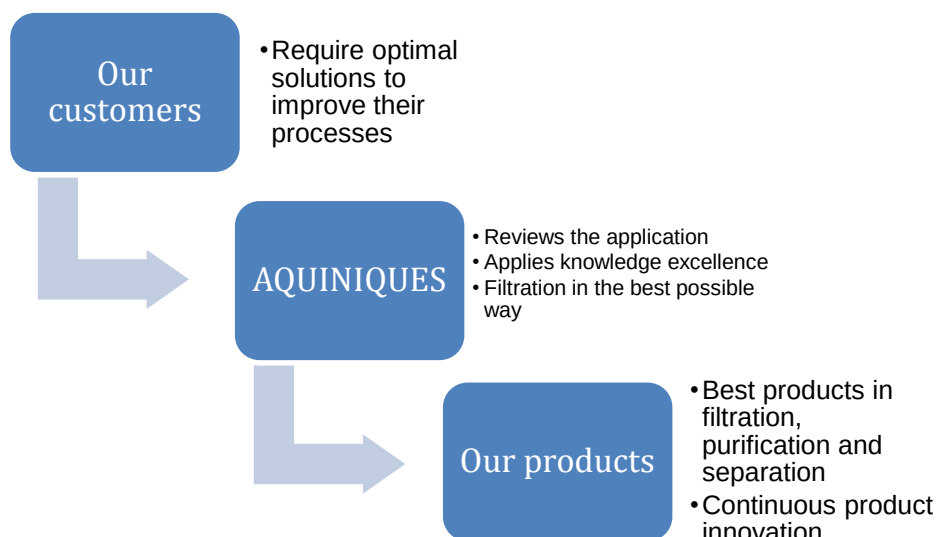

Hydranautics' products are currently in use on all seven continents. Product applications include potable water, boiler feed water, industrial process water, wastewater treatment, surface water treatment, seawater desalination, residential water, electronic rinse water, agricultural irrigation and pharmaceuticals. Comprehensive customer service and support is available round the clock and around the world.

AQUINIQUES (Pvt) Ltd

Customers are considered leaders in their respective industries; therefore, we provide a service equal to their needs.

Management and Ownership

Directors

Haider Abbas
Shabbar Hussain

Managing Director
Associate Director

Directors strive for continued improvement through knowledge excellence in the field of filtration, separation, and water purification.

Managers

Farhan Haider
Zara Fatima
Kashif Kamal
Qamar Mehdi

Business Development Manager
Admin Manager
Sales Engineer
Technical Sales Manager

Our managers work together to analyse our customer's' needs and to ensure that the most precise solution is applied.

They also oversee the internal sales and procurement and manage the customer service agents.
